

Atom Learning Online Platform

Thursday 26th September 2024

Dear Parents/Carers

Yesterday you may have noticed that you received an email from '**Atom Learning**', asking you to activate your account. As a school, we have signed up to their free, online learning platform called '**Atom School**'.

We will be starting to use Atom School for some tutoring and after-school club sessions held at Elmwood. We will inform you, by letter, if your child is asked to be part of those sessions. They will then be given their login details. We may look to expand our use of Atom School in the future and will keep you updated.

Atom Learning also has an extra **paid** service called 'Atom Home'. This is not something that we will use at school. However, you can subscribe to this, by choice, through your account. It offers Key Stage 2 activities in English, Maths and Science, as well as verbal and non-verbal reasoning. Atom Home's major selling point to parents is the practice tests they have for a range of secondary school entrance exams including the 11+ exams.

Please come and ask me if you have any questions. Thank you for your ongoing support.

Kind regards

Mr Pollock

Deputy Headteacher
